Heritage.

We are a British designer and manufacturer of exceptionally crafted taps, showers, bathroom accessories & architectural hardware, established in 1820.

Integrity and provenance remain our solid foundations ever since we began to manufacture the finest pieces of brassware from our factory in Birmingham, England.

Beginning as a traditional brass founder producing an array of high quality products for the home, we have built upon our industrious heritage. Now we are established worldwide as a manufacturer of brassware with a reputation for stylish design, quality and performance.

Craftsmanship.

From only a brief glimpse of a Samuel Heath product, it is apparent that craftsmanship remains central to our ethos.

At our historical brass foundry in Birmingham, England, products are born from an endeavour of time-honoured craft and advanced precision techniques, informed by unlimited expertise.

With every product, each brass component is meticulously formed from the purest Northern European brass, a sustainable material that allows for the recycling of byproduct. The brass is polished by hand for a flawless finish before undergoing an artisan electroplating process. Attention to detail dictates that each product is then assembled, checked and packed with the utmost care.

Forme is our most eco conscious collection, engineered with a focus on conscious design, sustainable materials and a refined process of manufacture. The range includes a reduced complexity and volume of components, meaning that our factory can significantly conserve energy and precious metal.

We offer regular tours at our factory in Birmingham, England and invite anyone interested in our design and manufacturing processes to visit. We have been on the same site since 1850, and would be delighted to show you around and introduce you to our craftspeople in person.

Design.

"As designers, our challenge lies in upholding the uncompromising attention to detail that is embedded in our tradition of excellence, while finding ways to refine our manufacturing to conserve precious metals and our factory's consumption of energy.

We take pride in creating beautiful products for everyday use in some of the world's most exciting and inspiring spaces - products that embody the quality and craftsmanship for which Samuel Heath is renowned."

Adam Daniels, Technical Director

SAMUEL

Our showroom at Design Centre Chelsea Harbour, London enables designers and specifiers to view our key collections in a beautiful environment.

You can also talk to one of our experts who will offer their knowledgeable advice and assistance.

IN COLLABORATION WITH:

LAURA H MMETT
LUXURY INTERIORS

Design concierge.

We offer interior designers and architects a comprehensive range of bespoke services for any size of project whether it be residential, hospitality or commercial.

Our expert team of design professionals knows instinctively how Samuel Heath products can seamlessly fit into some of the most challenging projects.

Product selection and advice

We can guide you from initial product selection through every stage of the design process including advising on product configurations and finishes.

Site visits

Our specialist teams are available to meet at your studio or on project location as required.

Product samples

Product samples are available to experience the design and quality of our products up close. We have a selection readily available with an opportunity to order specific products if required for sample rooms or client approval.

Sample finish swatches are freely available from stock.

Scheduling

We offer guidance and assistance with client design specifications and requirements including checking Samuel Heath product schedules.

Quotations

Our quotations feature detailed product images together with specification data for planning and installation.

Online library

Our online open resource and CAD library are freely available on our website with renders available for most finishes.

Please contact us if you wish to discuss any aspect of the Samuel Heath design concierge service.

Speed forme

Speed Forme brassware presents energy in motion, inspired by the sculpted characteristics of automotive and yacht design.

This dynamic range of brassware for the basin, bath, shower or bidet presents pared back spouts in tall, curved profiles to highlight the symmetry of matching controls. Lever and T-bar options feature angular, continuous lines styled with convex faces on their surface to nestle perfectly in the crease of the palm.

Classic forme

Classic Forme brassware offers timeless style in motion, inspired by the iconic nature of contemporary minimalism.

This extensive range of brassware for the basin, bath, shower or bidet presents a variety of elegantly slim, smooth spout varieties for deck or wall-mounted specifications. Cross top and lever control options in sharp, geometric shapes contrast as design features, yet their gently curved profiles flow effortlessly within a wider scheme.

Classic Forme was chosen for its modernist design, with its pared-back silhouettes and bold cross-head controls eliciting a contemporary simplicity.

RESIDENTIAL
Product: Classic Forme
Finish: Polished Nickel
Designer: The Curator's House

Oriel forme

The Oriel family of Forme controls boasts four distinct identities, offering further variation for basin, shower, or bidet solutions. All are styled in compact roundel shapes that appear suspended on deck or wall mounted application.

'Groove' and 'Bay' roundels offer fluted and geometric engravings to introduce refined pattern alongside a variety of tall, curved spouts. The 'Tab' roundel is a soft rendition of modernist design, with smooth tab detailing designed to evoke balance and flow when applied in symmetry. 'Pyramid' embodies decadence with a series of miniature pyramid engraving around its diameter, encouraging highlights and shadows to interact differently with each metallic finish.

SAMUEL HEATH
ONE HUNDRED
COLLECTION

Modern

One Hundred Collection 'Modern' design cues draw inspiration from emblematic British designs. The product's coach lines evoke the bonnet line of a classic Aston Martin, while the 'wing' handles and metal roundels exhibit a pure, sophisticated form with a touch of utilitarian elegance.

COLLECTION

Luxe

Embracing elegant glamour, One Hundred Collection 'Luxe' embodies the craftsmanship of the symbolic cricket bat, with its willow-wood blade refined over centuries.

This tribute to its evolution and refinement is prevalent in the lever design, where each component is meticulously crafted for beauty and ergonomic comfort. From the precisely knurled escutcheon detailing and mirror polished levers, each element of the One Hundred Collection has been designed to spark curiosity and delight the senses.

The result is a product that invites indulgence, demanding to be experienced and enjoyed.

LANDMARK LMK

Landmark LMK consists of two distinctive collections: Industrial with its contemporary, bold and urban styling and Pure with its well balanced concise and direct lines. Every component is individually engineered and developed by our skilled team of designers.

The collection takes its inspiration from probably one of the most influential movements in design history, Bauhaus. Rather than a faithful reproduction of the design sensibilities of the era Landmark possesses an individual identity secured by the finest craftsmanship. One of the core principles of Bauhaus was about designing a way of living and at Samuel Heath we believe that the impressive performance of a shower or tap fixture should be daily delights.

Both Landmark LMK collections include two spout options: the original standard spout and a slimmer sleeker spout design. This design evolution presents further design possibilities with an enhanced spout selection.

LANDMARK INDUSTRIAL

LMK INDUSTRIAL

Landmark LMK Industrial embraces the functional rationalism redolent of Bauhaus and interprets the values and design it pioneers. Perfect function and beautiful form, achieved by the use of the finest materials and a selection of finishes are also the values embedded in Samuel Heath's long manufacturing tradition.

These core values of acute attention to detail and use of innovative processes are identified in each expertly manufactured piece of Landmark LMK Industrial.

3 Hole deck mounted basin filler with standard spout and Lathe wheel controls in urban brass

Concealed thermostatic shower in antique brass matt

LANDMARK INDUSTRIAL
LMK INDUSTRIAL

Urban brass is exclusive to Landmark LMK and this part polished, part bead-blasted finish perfectly complements the collection's urban styling. Urban brass is left unlacquered so that it can develop its own natural patina over time which is part of its charm.

LANDMARK PURE

LMK PURE

Landmark Pure has overtones of the original Bauhaus aesthetic and builds on the foundations of Samuel Heath's Fairfield and Style Moderne Collections, both of which were inspired by dynamic and hugely influential periods in our cultural and industrial heritage.

Pure does not attempt to be a faithful reproduction of the products of Bauhaus, rather it utilises a design language that evokes the ethos of the period in an authentic manner.

By size and proportion it displays and celebrates elements of its functionality achieved through a harmony of materials, finishes and exquisite detailing. Pure is neutral and balanced with concise and direct lines.

STYLE MODERNE

Style Moderne is a highly distinctive collection of taps, showers and bathroom accessories inspired by the grace and glamour of the Art Deco period of the 1920s and 1930s. The elegance of this collection is an authentic reflection of the era yet its individual identity is secured with a modern interpretation.

With the Style Moderne collection, Samuel Heath has reinterpreted one of the most dynamic and influential design periods in history.

Fairfield

Fairfield taps, showers and bathroom accessories are a balanced combination of the diverse formal design influences of the Arts and Crafts and Aesthetic Movements which flourished between 1880 and 1910.

The careful proportioning of Fairfield also reflects the qualities inspired by the era whilst design options are enhanced by a choice of cross-top controls or levers available in crystal, wood, ceramic or metal.

Xenon

Pure, simple and bold

Xenon symbolises pure, simple form, without the distractions of the obscure and ornate. Xenon epitomises an ideal of longevity, which is function and form at its most pure.

A functionalist application of simple geometric form, bold and sculptural Xenon typifies the essence of minimalism without extraneous elements. Using only a small number of like shapes for design unity, a single object can become the focal point.

Befitting the contemporary design, Xenon offers numerous combinations of deck mounted and wall mounted shower and bath solutions to suit every conceivable installation in today's high technology world.

Finishes

Chrome - CP

Chrome plate finish is achieved by applying an initial layer of copper, followed by a layer of bright nickel and finally a coating of hard gloss chromium to achieve the lustrous hard-wearing mirror finish.

Polished Nickel - PN

Polished nickel is a warm luxurious finish which undergoes the same layering of copper and bright nickel. This finish is left unlacquered to allow its own natural patina to develop over time.

Stainless Steel Finish - SSF / Satin Nickel (US15)

This brushed nickel finish undergoes a layering of copper and satin nickel and is finished with an intricate brushing process to create the desired texture. The finish remains unlacquered to allow its natural patina to develop.

Stainless Steel Finish & Matt Black Chrome - SSB

This finish combination is available for One Hundred and LMK collections and combines two popular contemporary finishes. The matt black chrome accents provide a stunning contrast to the brushed satin nickel. This combination remains unlacquered so the nickel will patina over time.

Anthracite - ANT

Anthracite finish is a dark toned metallic finish which has a layer of nickel to create an underlying warmth. The final lacquering and curing results in a complex colour with cool and warm hues which react with light beautifully. The carefully considered matt lacquer creates a slight sheen which enhances the finish. Due to the nature of the process, there will always be a degree of natural variation in the shade of the components.

Matt Black Chrome - MBC

This coloured chrome finish is achieved by layering copper and satin nickel then a final layer of black chrome plate is applied to create this deep, smooth matt highly durable finish.

Amber Brass - AMR*

This finish is designed to reflect an aged finish with a colour tone reminiscent of amber, the polished surface undergoes a series of artistic colouring and gloss lacquering techniques to imbue the finish with its resplendent sheen and rich warm tones.

Antique Gold - AG

This subtle gold finish is achieved with protective layers of copper and bright nickel with a final layer of 24 carat real gold for a true saturated colour which darkens over time and offers natural resistance to corrosion.

Polished Brass - PB

This natural brass finish has an electrophoretic lacquer applied to preserve its colour and high shine and will maintain its look over time.

Using the finest European brass, our Master Polishers create a perfectly smooth surface with no imperfections. This is crucial in providing a flawless surface so that once electroplated, the finish bares the distinguishing features of depth, lustre and durability that Samuel Heath products are renowned for. An initial coating of copper is not always necessary when plating pure brass but we do so to ensure longevity. Each stage of the process is controlled by skilled technicians to ensure that the optimum depth of metal is applied for a lustrous and lasting finish.

A diverse range of metal and pure brass finishes means Samuel Heath brassware is ideal for both traditional and contemporary settings. Furthermore, many of Samuel Heath's finishes are available across our bathroom and hardware collections, allowing for seamless continuity.

Finish Guarantees

Chrome plated: We offer a **10 year guarantee** on the finish of all chrome plated architectural hardware, bathroom accessories, brassware and thermostatic showers.

Antique Gold: We offer a **2 year guarantee** from the date of purchase on Antique Gold plated finish.

Matt Black: Matt Black is an advanced durable finish which provides resistance to wear and is **guaranteed for 10 years**.

Other finishes: Non-Lacquered Brass, Polished Nickel, Satin Nickel, Satin Chrome, Stainless Steel Finish, Bronze finish, Antique Brass Unlacquered, Urban Brass and Brushed Gold develop their own patina over time which is part of their charm therefore we do not offer a guarantee for these finishes. City Bronze, Country Bronze, Antique Brass Matt, Antique Brass Gloss, Amber Brass, Anthracite, Brushed Gold Matt, Brushed Gold Gloss, Urban Brass Matt, Old Brass Matt and Polished Brass lacquered are **guaranteed for 5 years**.

Non-Lacquered Brass - NL

This natural brass finish is unlacquered to allow its unique patina to develop over time. Alternatively, if cleaned regularly after use it can maintain its lustre.

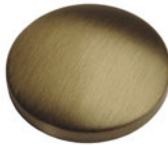

City Bronze – CTB*

City bronze is a contemporary dark bronze shade which is a hand applied metallic finish. An application of matt lacquer means that the finish will maintain its colour and look over time and will not patina.

Country Bronze – CNB*

Country bronze is a light, warm shade of bronze which is a hand applied metallic finish. An application of matt lacquer means that the finish will maintain its colour and look over time and will not patina.

Antique Brass Matt – ABM*

This vintage brass finish has an aged brass affect which is achieved using a combination of creative and technical lacquering and colouring processes. The finish is lacquered which allows its original aged look to be preserved over time.

Old Brass Matt – OBM

Old Brass Matt is an aged brass aesthetic with a warm brass tone with striations of dark tones to create a vintage, layered finish. The additional process of pigmentation allows for the unique dark striations whilst a matt lacquer ensures the finish remains constant. Due to the nature of the process, there will always be a degree of natural variation in the shade of the components.

Brushed Gold Matt – BGM

This brushed gold finish is a natural brass finish which is hand polished and finished with an intricate brushing process to achieve its textured look. A layer of matt lacquer is finally applied to achieve a lasting satin finish.

Urban Brass Matt – URM**

Exclusive to LMK collection this natural brass finish is part brushed and part bead blasted to create this urban look. A layer of matt lacquer is applied to maintain a lasting matt finish which maintains its look over time.

Antique Brass Gloss – ABG*

This aged brass finish has undergone a process to mimic a patina effect which is achieved using a combination of creative and technical lacquering and colouring processes. The finish has a gloss lacquer which allows it to maintain its original aged look over time.

Brushed Gold Gloss - BGG

This brushed gold finish is a natural brass finish which is hand polished and finished with an intricate brushing process to achieve its textured look. A layer of gloss lacquer is finally applied to achieve a lasting gloss finish.

Brushed Gold – BG

This brushed gold finish is a natural brass finish which is hand polished and finished with an intricate brushing process to achieve its textured look. The finish is left unlacquered to allow its natural patina to develop over time.

Urban Brass – URB**

Exclusive to LMK collection this dual effect is achieved using part polished and part bead blasting to create this urban styling. This finish remains unlacquered to allow its patina to develop over time.
